

Day 6

Language Arts - Favorite Food

Draw a picture of one of your favorite foods. Write 5 words to describe it. If you can, try to write 5 sentences about your favorite food.

Math - Number Writing

Get a piece of paper. Practice writing your numbers. How many can you write?

Science - Testing the Strength of an Ordinary Egg

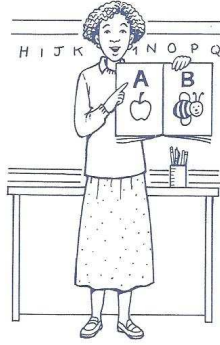

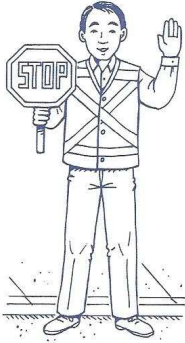

Talk about the properties of an egg - round, light, smooth and light. Ask your child to make a scientific guess about the egg's strength. Is an egg strong and powerful or weak and fragile? Carefully place the uncooked, ordinary egg in some soft clay. Using the egg and two cans of soup or two blocks, make a triangular base to support a large, lightweight cookie sheet (see photo below). Slowly add books to the cookie sheet to see how much weight the egg could help support. Continue to add books. Will the egg break? Remember the egg has an arch at each end making an excellent structure for supporting weight.

Social Studies - Matching Workers and Worksites
Print the Worker cards and Place cards, and cut along the dotted lines. Explain to your child that some cards have pictures of workers on them and some have pictures of where they work. Mix the cards up and place them face down. Turn over one worker card and one worksite card; if they match you get to go again. If your cards don't match, turn them over and let the next person try to get a match. If your child is playing by him/her self, they can sort the cards so they match.

Name _____

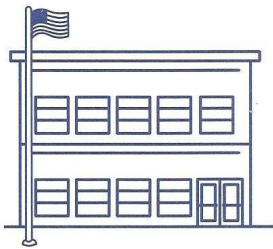

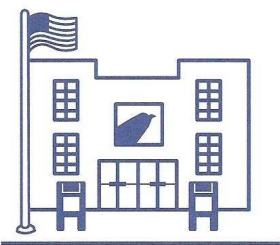

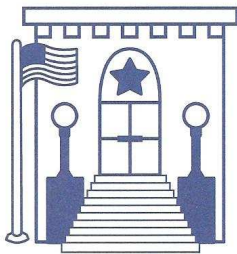

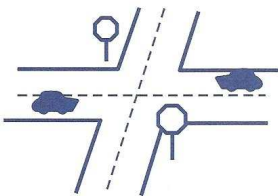

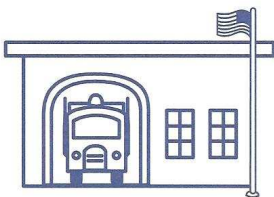

Worker Cards

<p>teacher</p> 	<p>mail carrier</p> 	<p>police officer</p> 
<p>crossing guard</p> 	<p>fire fighter</p> 	<p>cashier</p> 

Objective: Match workers with places they work.

Name _____

Place Cards

<p>school</p> 	<p>post office</p> 	<p>police station</p> 
<p>street corner</p> 	<p>fire station</p> 	<p>store</p> 

Objective: Match workers with places they work.
