## **I. PURPOSE AND OVERVIEW**

The Readington School District world language program provides a balanced instructional approach which includes common beliefs. The Spanish curriculum identifies the essential knowledge and skills that prepare students to communicate in Spanish, gain knowledge and understanding of other cultures, connect with other disciplines and acquire information, develop insight into the nature of the Spanish language and culture, and participate in multilingual communities at home and around the world. Authentic practice of these skills enables students to realize their potential as global citizens who think critically and solve problems using the communication and collaboration skills gained from learning world languages and cultures. In the Spanish World Language classroom, Readington Township students have the opportunity to:

- Be immersed in the target language.
- Communicate effectively and with appropriate cultural sensitivity with others verbally and in writing.
- Use interpretative and interpersonal modes to communicate.
- Be participating members of a global society.

The goal of world language is to prepare learners to apply their skills and understandings measured by the New Jersey Student Learning Standards (NJSLS) and to bring global competence to students' future careers and experiences. In grades K-5, students receive world language instruction in Spanish. Spanish is the foundation of the world language program in the Readington Township Schools. Recent data reveals that Spanish is the official language of over 20 nations in North, Central, and South America, as well as in Spain, several nations in Africa, and the Philippines.

Students will use the modes of interpretive, interpersonal, and presentational communication when in the World Language classrooms. The mission of the exploratory world language program in grades Kindergarten through Five is to transmit enjoyment of another language, to introduce cultures of other countries, and to provide an opportunity for students to begin communicating in a language other than their own native language.

As students near the end of Grade Five, they select a world language to study in Grades Six, Seven, and Eight. In Grades Six through Eight, students have the option to select French, Mandarin, or Spanish as their choice for World Language instruction. Native language speakers (those raised in an environment using mainly a language other than English) are supported so that they are able to continue to develop their heritage linguistic and cultural skills in order to become fully bilingual and biliterate in today's global environment. Native speakers may select to develop their native language while enrolled in the middle school grades. Native language speakers will refine pronunciation, build their writing skills, and advance reading proficiency in the native language.

## **II. COMPONENTS OF EFFECTIVE WORLD LANGUAGE CURRICULUM**

The components of a successful world language curriculum identify with the 5 "C" goal areas (Communication, Cultures, Connections, Comparisons, and Communities) and the details of the standards for world language learning. Readington Township strives to educate students who are linguistically and culturally equipped to communicate successfully in a pluralistic American society and abroad. Our curriculum lays the foundation for students in grades K-8 so that all students will develop and maintain proficiency in English and at least one other language.

## **III. GOALS:**

This curriculum is linked to the 2020 New Jersey Student Learning Standards for World Languages. Each unit is connected directly to the Mission and Vision, Performance Expectations, Disciplinary Concepts and Core Ideas, and Practices outlined in this document.

#### IV. ASSESSMENT

Assessment is an essential element of effective instruction and is an ongoing process. Its primary purpose is to provide precise and meaningful data regarding student achievement of intended learning targets. The data produced by formative and summative measurement is used to build on student successes and adjust instruction to meet individual needs.

Evidence of academic growth can be demonstrated in multiple ways throughout each unit. A variety of assessment formats have been developed, and current academic research is always at the forefront when assessing our students. Assessments include but are not limited to teacher-made tests and quizzes, observations, performance tasks, rubrics, written responses, and presentations. [Accommodations and modifications](#) are available for those students who demonstrate a need and can be located on the curriculum page of the district website.
