August 26, 2021

Dear Parents and Guardians,

The parents and students of Readington Township have a unique opportunity to participate in a research project being conducted through Temple University. This project was approved at the August 24, 2021 Board of Education meeting.

The STEM Learning Lab at Temple University is seeking English-speaking students enrolled in grades four through 10 in the 2020-2021 school year and their parents to participate in an online study about their math learning. All **materials are completed online**, and should take no more than an hour each for a parent and a student to complete.

Parents, if you are interested in participating, please complete this information form ([STEMlab--Readington](#)), after which you will receive an email instructing your student to complete their portion. Participants will each receive an electronic \$10 Amazon gift card, and families will also be entered for a chance to win a \$100 Amazon gift card.

If parents or guardians have any questions regarding this study, please contact Dr. Julie Booth at Temple University at [julie.booth@temple.edu](mailto:julie.booth@temple.edu).

Very truly yours,

Jonathan Hart, Ph.D.  
Superintendent of Schools
