I. PURPOSE AND OVERVIEW

The Readington School District fine arts program provides a balanced instructional approach which includes common beliefs: (1) artistically literate citizens use a variety of artistic media, symbols and metaphors to independently create and perform work that expresses and communicates their own ideas, and are able to respond by analyzing and interpreting the artistic communication of others, (2) artistically literate citizens to find at least one arts discipline in which they develop sufficient competence in to continue active involvement in creating, performing, and responding to art as an adult, (3) artistically literate citizens to know and understand artwork from varied historically periods and cultures, and actively seek and appreciate diverse forms and genres of artwork of enduring quality/significance. They should also seek to understand relationships among the arts, and cultivate habits of searching for and identifying patterns, relationships, between the arts and other knowledge, (4) artistically literate citizens to find joy, inspiration, peace, intellectual stimulation, meaning, and other life-enhancing qualities through participation in all of the arts, and (5) artistically literate citizens to seek artistic experience and support the arts in their local, state, national, and global communities.

The kindergarten through grade eight curricula is designed to build on the curriculum from previous grades. Readington Township's curriculum is designed to be responsive to the developmental stages of learners. The curriculum progresses across grades and levels to create a sequential, standards-based approach to arts education.

The music curriculum has been developed for the Readington Township School District based on the newly published National Core Arts Standards, which are defined as Dance, Media Arts, Music, Theater, and Visual Arts. The national standards for the Visual Arts were developed by the National Art Education Association Art Standard Committee to reflect a national consensus of the views of organizations and individuals representing educators, parents, artists, professional associations in education and in the arts, public and private educational institutions, philanthropic organizations, and leaders from government, labor, and business.

In music, formal instruction in performing on a musical instrument begins in grade three with the recorder. Students learn on soprano recorders that are provided by the district. Playing the recorder provides students with a hands-on approach to mastering several Music Education Content Standards, such as learning to read traditional notation on the music staff (treble clef). In fourth grade students may select from a variety of instruments including; strings, brass, woodwind, or percussion for formal lessons.

In the upper elementary school, children become increasingly keen observers of their world. They enjoy inventing games, working cooperatively, and creating personal codes and languages. An increased attention span enables memorization and the enjoyment of lengthened musical experiences. It also allows greater involvement in activities that require small-muscle control and dexterity.

Elementary Instrumental Instruction will introduce the beginning and intermediate student (Grades 4 and 5) to the technical and physical skills needed to perform proficiently on a band or orchestra instrument. Music courses will include the following: elementary theory, care and maintenance of the instrument, elementary physical and technical skills needed to play the instrument, and the study and practice techniques required to succeed in performing satisfactorily on an instrument. The intent of the program is three-fold: first, to provide the student with the basic skills needed to progress satisfactorily on an instrument; second, to provide the student with sufficient knowledge to continue instrumental studies; and third, to expose the student to ensemble playing.

II. RATIONALE AND PHILOSOPHY

Music is an important part of a cohesive, comprehensive and developmentally appropriate elementary education for several reasons. First, music has its own unique mode of thinking. The process involved in creating and performing music helps students to develop higher level thinking skills which can be applied to all other areas of learning. By developing the musical aptitude of students, we are training them to be creative independent thinkers. The sequential process of developing the musical skills gives the student opportunities for cognitive and aesthetic growth, social interaction, emotional and personal expression and teaches discriminating judgments. Students learn how to interpret and understand the emotions in the music expressed by composers and how to express themselves through listening to and creating music of their own. This allows the students to more easily interpret the world around them and to more easily express themselves in other areas as well. By providing the students with the tools for music literacy and teaching them how to express themselves through music, we are providing them with access to understanding music as an art form that can give them a lifetime of fulfillment.

Music plays an important role in the education of all students. Music is a unique language for expression. As far back as the ancient Greeks, music has been considered the mirror of the soul. Music expresses spiritual and emotional values that are both personal and universal. Music expands the creative capabilities of each person and contributes greatly to increased learning capacities in diverse subject areas. The study and performance of music integrates and harmonizes the mind and body and promotes a sense of well-being. Music is the universal language which provides the means to overcome political and geographic barriers.

In highly technical and rapidly changing society, music remains a constant link to the past, provides an understanding of the present, and establishes a path to the future. Music offers limitless possibilities to enhance the quality of life.

Student participation, effort and skill levels are continually evaluated and assessed through solo and group performance; individual and group projects; and individual and class dictation and notation. Students are

expected to perform, write, hear and derive concepts appropriate to their grade level. Based on this continual evaluation students are given a grade each marking period reflecting these three categories:

Effort: Evaluation is based on the consciousness of the student's singing, performing and practicing of skills.

Skills: Evaluation is based on the student demonstrating knowledge and mastery of concepts appropriate to their grade level through singing, playing instruments, dictation and notation.

Participation: Evaluation is based on the student's amount and quality of participation in individual and group performance and lesson.

VI. GROUPING OF STUDENTS

Grades K-5

Students attend classroom general music classes in grades K-5 in a heterogeneous regular classroom. Instrumental 4th and 5th grade lessons are taught in small group pull-out by like or mixed instruments. Ensemble rehearsals for string instruments and for band include the full orchestra/band during the arts enrichment period once a week. Fourth and fifth grade vocal students participate in a chorus ensemble that also meets during the arts enrichment period once a week. Samba Kids in 5th grade is selected by audition and rehearses after school.

Grades 6-8

Students participate in music instruction through enrollment in Band, Orchestra, Chorus, or General Music. All students are encouraged to participate in at least one of these classes during their middle school years. The Band, Chorus and Orchestra classes are scheduled every other day. The instrumental music teachers team teach each ensemble rehearsal. Advanced ensemble opportunities are available to all students after school based on an audition.

Understandings:

Students will understand that...

- o The creative ideas, concepts, and feelings that influence musicians' work emerge from a variety of sources.
- o Musicians' creative choices are influenced by their expertise, context, and expressive intent.
- o Musicians evaluate and refine their work through openness to new ideas, persistence, and the application of appropriate criteria.
- o Musicians' presentation of creative work is the culmination of a process of creation and communication.
- o Performers' interest in and knowledge of musical works, understanding of their own technical skill, and the context for a performance influence the selection of repertoire.

Essential Questions:

- How do musicians generate creative ideas?
- How do musicians make creative decisions?
- How do musicians improve the quality of their creative work?
- When is creative work ready to share?
- How do performers select repertoire?
- How does understanding the structure and context of musical works inform performance?
- How do performers interpret musical works?
- How do musicians improve the quality of their performance?

Learning Plan

Possible Learning Activities:

- Work in small groups and explore the historical roots of selected composers, musical eras, styles, and repertoire. Compare groups' findings. n learn a South African song such as “Simbahaya.” Then, discuss South Africa’s contemporary history, including the story of Nelson Mandela and the country’s former social system. Create accompaniment on classroom instruments. If available, provide African-derived instruments such as cowry shell gourds, wooden rattles, and mbiras (thumb pianos) to increase authenticity of instrumental accompaniment.

IX. MUSIC COURSE DESCRIPTION FOR GRADES 6-8

Readington Middle School provides a variety of performing ensembles. In the choral program, the 6th – 8th grade choirs are co-curricular elective courses that meet during the regular school day. Students in 7th and 8th grade can elect to audition for Readington Rhapsody, a select vocal ensemble which performs a higher level of literature than the grade level choirs. Readington Rhapsody is an extra-curricular course offering. In the instrumental program, both orchestra and band students participate in 6th-8th grade ensembles that are co-curricular elective courses that meet during the regular school day. Students electing to deepen their involvement in the instrumental music program can audition for any or all of our after school ensembles. These include Pops Orchestra, Wind Symphony, Viking Cruisers (Pep Band), Jazz Ensemble and Pit Orchestra. General Music is designed to provide a meaningful musical experience for students who choose not to participate in an ensemble. This can also complement/enhance students' ensemble experience should they choose to take this class in addition to band, orchestra, or chorus.
